

R.C.E. Electric Equipment

**“Customer satisfaction with quality,  
punctuality and price.”**

RCE has been designing, developing and manufacturing industrial cabling, co-molded connectors and electrical panels for over 20 years.

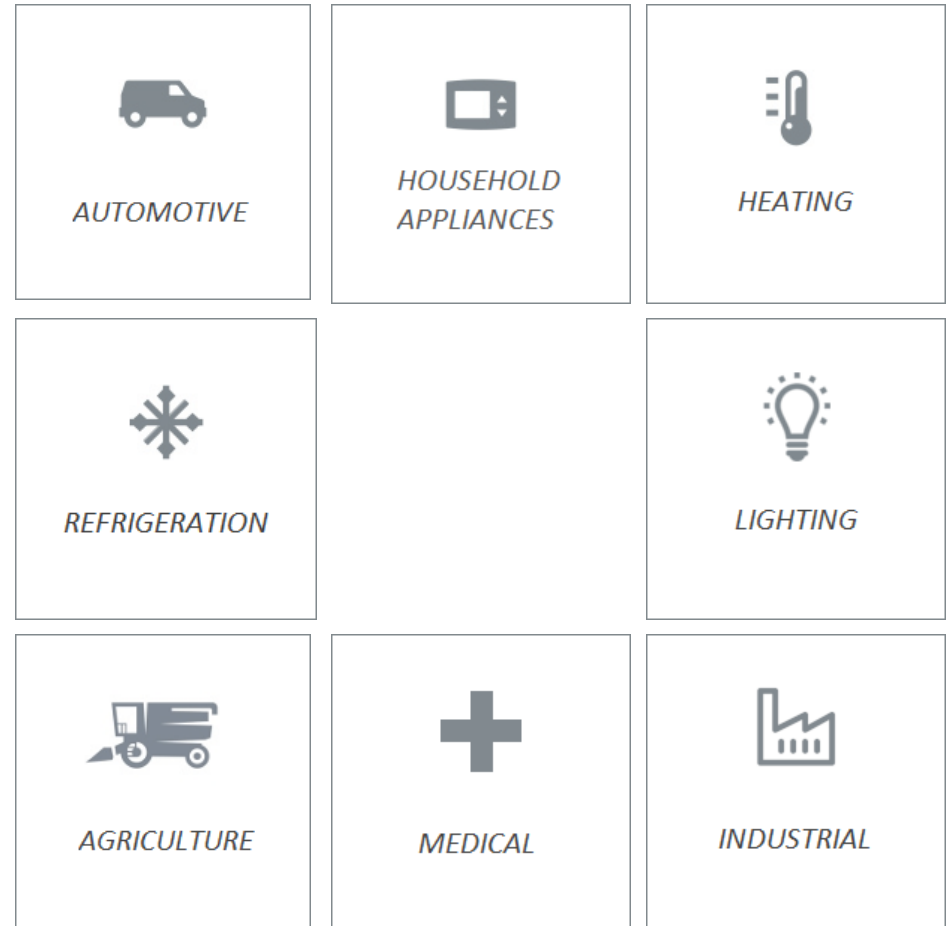

Our strength is experience, flexibility and the ability to develop solutions to specific customer requests. These characteristics allow us to define the most appropriate technologies and production methods to obtain a product with a competitive quality-price ratio.

RCE operates in various industrial sectors including automotive, household appliance, heating, refrigeration, lighting, agriculture and medical.

Our main customers include large international groups. Thanks to the flexibility that sets us apart, we provide our service to many small and medium enterprises, guaranteeing them the best technical support and quality standards.

The goal that accompanies RCE in its activity is the satisfaction of customer.

- Design, development and production of electrical and electronic industrial wiring for various uses in the sectors:
  - **Automotive**
  - **Household Appliances**
  - **Heating**
  - **Refrigeration**
  - **Lighting**
  - **Agriculture**
  - **Medical**
- Special cable processing and development of customized solutions.
- Assembly of electrical / electronic equipment.

RCE is certified:

**UNI EN 9001**

(december 2015)

Also respect the

**RoHS COMMUNITY STANDARDS**

(2011/65/CE)

## Automotive

- Connection systems for the automotive sector

## Power

- Power connection systems

## Heating

- Connection systems for the heating sector

## Agriculture

- Connection systems for the agricultural sector

## Industrial

- Connection systems for the industrial sector

## Molded Connectors

- Co-molded connector connection systems

## Main technologies & processes

- Cutting and stripping
- Crimping
- IDC
- Welding
  - Tin soldering
  - Induction
  - Resistance
- Molding
- Potting
- Shielding
- Testing

## Marking/Labelling

- Ink Jet
- Laser

## Cutting and stripping

- One of the RCE processes is the cutting and stripping of cables, thanks to 2 Schleuniger machines capable of automatically processing large cables and wires up to 35 mm in diameter and guaranteeing high performance, precision and flexibility.

Cut to length

Full or partial strip left and right

Jacket and inner conductor stripping

Jacket stripping of extremely thin insulations

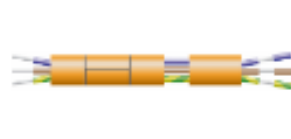

Jacket stripping of multi-conductor cables

Multi-layer stripping

Multi-layer with shield processing (Coax, Hybrid, etc.)

Multi-step jacket stripping with inner conductor stripping and window slitting

Multi-step stripping

Trimming, separating and stripping of individual zipcord conductors

Wire marking

CABLES FOR  
FIXED  
INSTALLATION

CABLES WITH  
UL STANDARD

CABLES FOR  
MOBILE  
INSTALLATION

CABLES FOR  
CONTROL

**Crimping**

**IDC-IPC**

**Welding**

Induction

Tin soldering

**Molding**

**Potting**

**Shielding**

## Testing

Connection, component and functional testing of switches and buttons

Test of connection of components, insulation, electrical resistance, functional of switches and push-buttons, functional of relays and components with RLC meter

Resistance welding machine

Induction welding machine

Macromelt molding

Polyurethane molding

Press for crimping pre-insulated tips

Machine for insulation piercing connectors pitch 2.5-5

Machine for heat shrink tubes

Cutting machine for heat shrinkable tubes and flat cables

Tying system for cables in skeins

Automatic binding system with cable ties

Pre-insulated head press

Machine for cutting and stripping multipolar cables

Wire stripper with electronic adjustment

Wire stripping from 2.5 to 16 mm<sup>2</sup>

RCE has:

- Schleuniger machines for multipolar cable processing
- Komax machines for wire processing
